**Conesus Lake
Watershed Outreach
Tour & Meeting**

August 19, 2008

**Cornell University
Cooperative Extension**

"Cornell University Cooperative Extension provides equal program and employment opportunities."

"CCE does not endorse or recommend any specific product or service. This program is solely intended to educate consumers about their choices."

Please pre-register
by: August 12th

For 7 years, work has been continuing relative to upstream land management, runoff water monitoring and lake weed beds in several Conesus Lake sub-watersheds. The funding from USDA Cooperative Science, Research, Education and Extension Service (CSREES) for the research portions of this project has ended. It is time for a summary and outreach session relative to the implementation of best management practices (BMPs) and water quality changes.

Please join us for a tour and meeting on August 19 starting at Long Point Park. This is a split day tour with upstream practices being featured in early afternoon and lake practices in late afternoon.

You are welcome to register for part or all of the tour, **but please pre-register by August 12th as space is limited.** We need numbers to plan our handout materials, lunches and boats. There is a registration fee of \$10.00 to cover the cost of materials and lunch. You may sign up for the entire day or for either the land management portion or the lake portion.

There is no fee if you sign up for the lake portion only.

Agenda for the Conesus Lake Outreach Day:

- **11:15 a.m.** Long Point Park Geneseo (West Lake Rd.-Rt. 256 at Long Point Rd.) – Introduction and Overview of Project, especially upstream land management
- **11:40 a.m.** Lunch provided at the park
- **12:15 p.m.** Vans and caravan to Barber Farms, Stapley Road. BMPs featured – water and sediment control basins, strip cropping, reduced tillage, reduced fertilizer
- **1:00 p.m.** Dairy Knoll Farm – 4693 Rosebrugh Rd. BMPs include manure storage, elimination of winter spreading, manure injection, reduced fertilizer, CAFO planning. This dairy farm operates farmland in Long Point watershed.
- **1:45 p.m.** Maxwell Farms – 3977 Lakeville-Groveland Rd. – BMPs featured – strip cropping, farmstead runoff management, reduction in fertilizer, fencing streams, filter strips, managed manure spreading, sub-surface drainage, cover crops.
- **2:30 p.m.** Return to Long Point
- **2:45 p.m.** Overview of Water Sampling and Lake Monitoring
- **3:00 p.m.** Board stable pontoon boats for Conesus Lake Tour portion.
 - I. Lake conditions at the present

time and weed changes, impact of watershed changes.

2. 2006-07 Water Circulation Technology test areas.
 3. Redirection of North Gully Creek and McPherson south cove mitigations.
 4. View Sand Point pasture and fencing cattle out of streams.
- **5:00 p.m.** Wrap up at Long Point. Thanks for USDA-CSREES multi-agency, farmer and Conesus Lake Association cooperation.

CCA Credits will be available for CAFO Planners & Crop Advisors
